

Press Release

April 2012

Stella Watermakers - Easy to Use, Reliable, Australian Made!

Stella Watermakers are the result of many years of experience operating, servicing, selling and installing all brands of watermakers (reverse osmosis desalination plants). Proudly **designed and manufactured in Australia**, Stella Watermakers combine **simplicity** with **quality components** to create a reliable, easy to use system that offers **real value for money**. Whether you are a seasoned superyacht engineer or cruising yachty our modular watermakers are designed for easy installation, operation and maintenance.

Stella Advantages

- Simple manual operation, no electronics
- Super performance and reliability
- Quality 316 stainless steel components
- No flashing lights or failing circuit boards
- No high maintenance energy recovery pumps
- No cracking plastic membrane end plugs
- No proprietary components
- Modular design for easy installation
- 70-210 litres of water per hour (expandable)
- Best aftersales service and backup
- Installation and servicing if required
- 12 month limited Australian warranty
- Proudly designed and manufactured in Australia

With offices in Brisbane and the Gold Coast, Stella Systems not only sell new watermakers, they also offer a complete installation and maintenance service for all watermaker brands through their engineering division Stella Marine.

Brisbane (07) 3890 5680
Gold Coast (07) 5580 4019
